Dear Sir/Mam,

I am a master's student from the International Space University, Strasbourg.
I heard about an opening for a Java developer from my professor. I have 3 years of experience in software, primarily in Java (Please find attached my profile).
I am very passionate about astronomy and interested in this posting.
I would like to know more details, and application procedure for this posting.

Kindly do let me know,

Thank you, have a nice day,

Kind regards,
Chaitra.
