To Whom It May Concern,

I came across possible job openings at CDS through website, and I think you will find I am an exceptional candidate for this position. I can assure you that my diverse skills and qualifications will make me an asset to the ASTERICS project group.

I am currently interning at NASA Ames Research Center as part of my Master of Space Studies at International Space University, in France. I have a strong technical background and have successfully applied my skills on many projects, which has also allowed me to gain crucial team work experience. I have studied subjects such as embedded systems, signal processing and digital image processing as a part of the engineering and have done lots of programming for the CubeSats. I am looking for a position which will allow me to utilize my experience in the greater space sector. I offer exceptional attention to details, excellent communication and decision making skills, and a talent to handle projects with a demonstrated ability to prioritize and multitask.

My accomplishment and qualifications are further detailed in my attached resume. I look forward to the opportunity to speak with you and discuss the value that I can bring to project group.

Thank you for your time and consideration.

Sincerely,

Karishma Inamdar.
