Aladin Lite

Embed the sky in your browser

Aladin Lite can display all-sky image surveys, and various graphical overlays.

- MOCs (Multi-Order Coverage maps) for images or catalogues
- Instrument footprints, circles, polygons, ...
- Polylines (draw constellations)
- Markers with popup information

On the front side, you can see MOCs for the SDSS-DR9 sky coverage (shaded purple area) and the Spitzer GLIMPSE360 (orange HEALPix grid) overlaid on an all-sky IRIS/IRAS image.
