

VOTECH
Stage 2 meetings

DS6 Stage 2 plans at CDS

F.Bonnarel

(in behalf of CDS/Observatoire de Strasbourg)

VisVo / CDS continuation

- Consolidation (T.Boch, and A.Schaaff)
- Development of science cases (Mark Allen, F.Bonnarel)

DAL standards

- New implementation of extensions of SIA.
 - Observations FOV (see DS4)
 - S« 3Dspectroscopy »AL (Russians)
 - MOS or Xray equivalents = SIA + associated SSA (with XMM SSC in Strasbourg)
 - Others = Images + Associated catalogs ?

Characterisation DM implementations

- Define utypes based on Char for SIA 1.1 and FOV
- Java classes (see DS4)

Kd-tree and large databases

- As decided in Phase 1

PLatform for AStronomical Tools InterCommunication

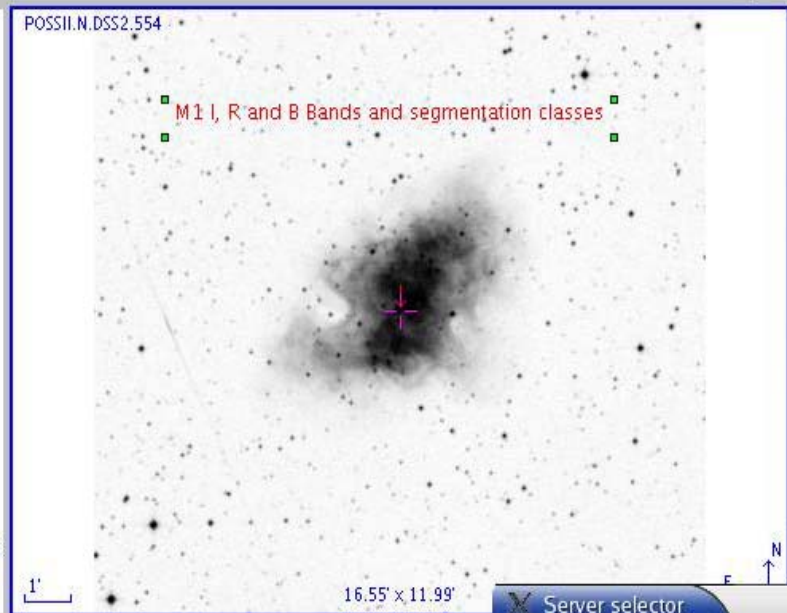

- The « plastic » concept emerged after the Australian visualisation workshop
- Idea: make visualisation tools communicate (like e.g. VisVo/Aladin or Aladin/VOplot)

BUT in a platform and language independant basis (like eg ACR)

- Specification phase and use case definition is really critical: a new « standard » definition!
- CDS plans to participate to the spec phase and then implement the protocol in Aladin.
- People: T.Boch, S.Derrière, P.Fernique , M.Allen, ..

Multiband Images visualisation and Processing

- Work described in February has been going on with MDA project support.
 - OTIAM : a set of IPV tools with its manager has been developed
 - OTIAM is interfaced with a Workflow tool
 - OTIAM has been interfaced with Aladin
- Anybody interested in collaborate ?
