

Improved cross-match

- Take into account error ellipses
 - RA, DEC
 - Semi-major/minor axis, position angle
- Application to error ellipses or extended sources

Improved cross-match

- Customized column output
 - Select a subsample of columns in the resulting table
- Proper UCD management
 - UCD1 and UCD1+
 - Ensure that the resulting VOTable is valid (no 2 columns have the same UCD with `_MAIN` or `meta.main` attribute)
 - Automated default behaviour
 - Manual selection
