# Aladin 2013 milestones

---

- 1) **Aladin Lite** first release
- 2) « Hierarchical Progressive Surveys » (**HiPS**) extensive usage
- 3) Strong & productive **R&D** efforts

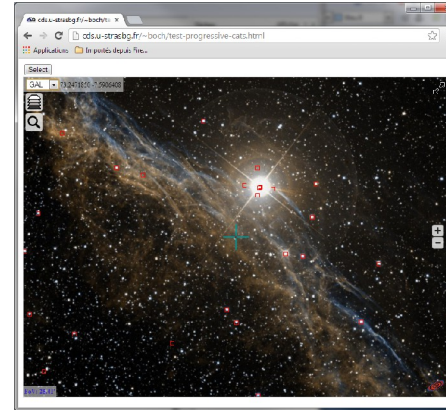

# Aladin tool: Two approaches, Two usages

## Aladin

- Java
- Classic installation
- All features

## Aladin Lite

- Javascript
- Inside browser (no installation)
- Display & Selection functionalities
- Alternative to applet

*Demo in  
10mn*

# HiPS

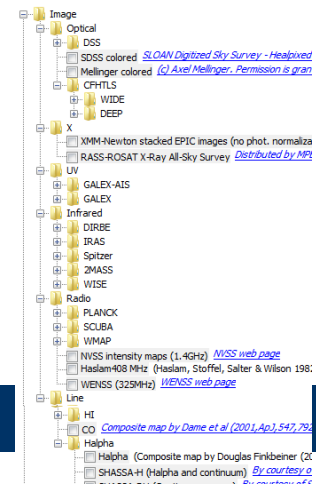

## Remind me what it is ?

*The CDS promotes a method for visualizing surveys based on the HEALPix sky tessellation. This method, called "Hierarchical Progressive Survey" or HiPS, allows one to display a survey progressively, based on the principle that "the more you zoom in on a particular area the more details show up".*

# HiPS generation

- 2012 : 76 surveys/19To => 2013 : 130/30To
- Hardware upgrade 40T => 100To
- Software Skygen HiPS generator (available in GUI mode and batch mode)

- CDS :CFHTLS, PLANCK, Fermi, DSS  
F+R, SDSSDR9 color,  
ULTRAVISTA, ...

In preparation : SDSSDR9 bands

- IRAP collaboration: DIRBE, IRIS,  
BOLOCAM, DWINGELOO, VGPS,  
GASS, LAB, ...
- CADC collaboration: HST bands
- In test :  
ROE => VISTA  
MAST =>GALEX

# HiPS usages

- New HiPS compatible clients

Tool	Technology	First release date	Origin <sup>1</sup>
Aladin	Java	2009	CDS
Mizar	HTML5/WebGL	2012	CNES
Aladin Lite	HTML5/Canvas	2013	CDS
Imaging Toolbox	Aladin Lite extension	2013	Blackwaterskies
MAST portal	Flash	in test	VAO
Asterope	Java	in progress	Kotek

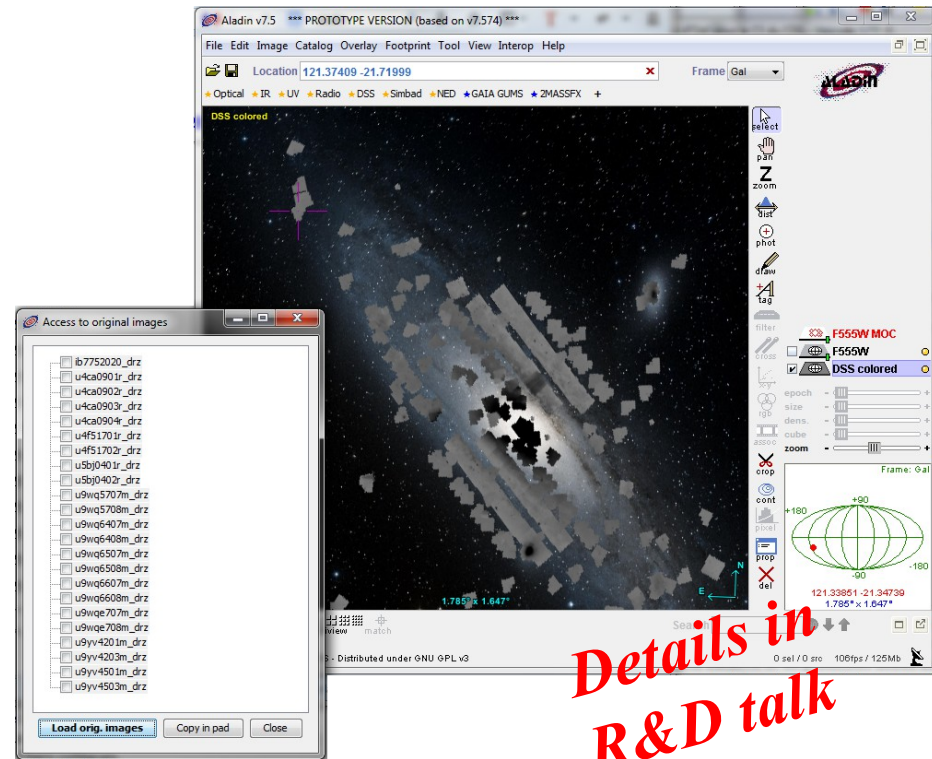

- GAIA CU9 usage of HiPS for catalog browsing

# Aladin 2013 R&D actions

- HiPS adaptation for catalogs
- Progenitor facility (allow to retrieve original images from HiPS)

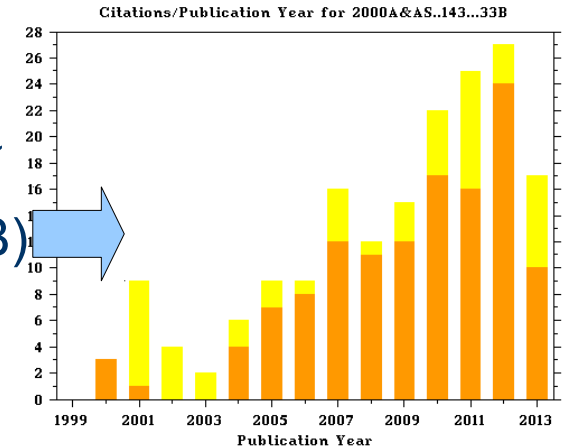

# Aladin statistics

Oct 2013

- 1 500 sessions/day ↓
- 30 000 queries/day ↑
- 120 software installations/day ↓
- 176 citations ↑ (2000A&AS..143...33B)
- 130 HiPS surveys ↑↑
- ~100 Aladin Lite/day ↑
- ~2 FTE ↓ (*P.Fernique, T.Boch, F.Bonnarel*)

# Evolution

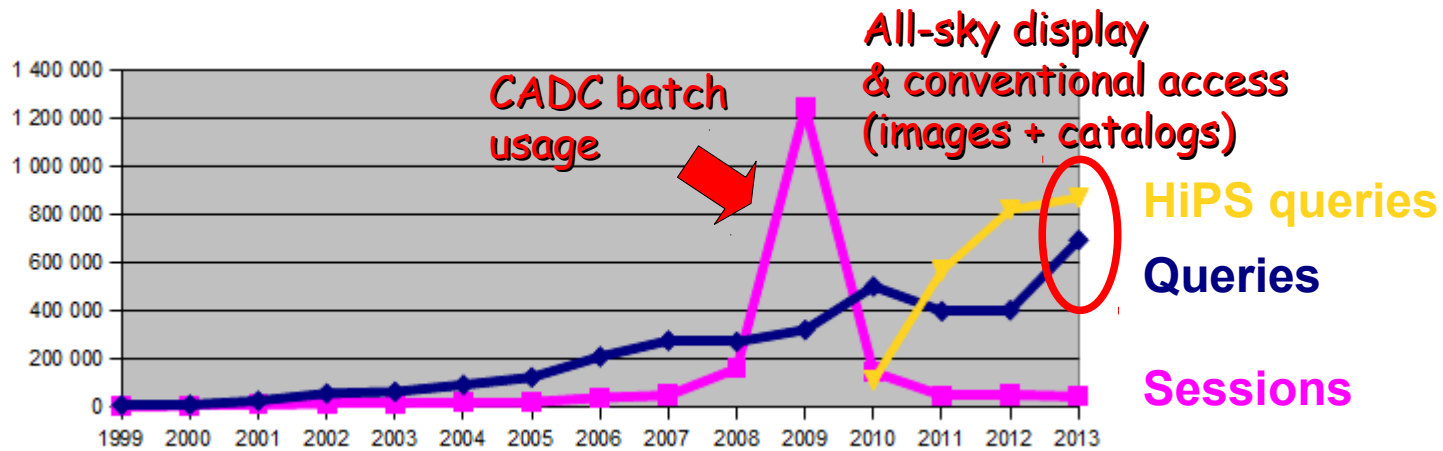

Since 3 years  
More astronomers  
Less visitors

Audience

Usage

(\* per month)

# All figures

<i>Per month</i>	<i>Hosts</i>		<i>Queries</i>		<i>Sessions</i>		<i>Install</i>		<i>Helpix queries</i>

# Next steps...

- Promote Aladin Lite (replace applet,...)
- Stabilize HiPS catalog production  
(related to large catalog ingestion pipe-line)
- Unify metadata (catalogs, images, MOCs)
- Finalize HiPS progenitor R&D task
- Start R&D task for HiPS cube
- Aladin V8 release (for Christmas) : MOC tool, PM tool, SED tool, HiPS support improvement, VO standard update (VOTable 1.3, STC, SAMP ...)
